

Performance in initiating and delivering research

The Government wants to see a dramatic and sustained improvement in the performance of The Government's [Plan for Growth](#), published in March 2011, with the aim of increasing the number of patients who have the opportunity to participate in research. As part of its research performance reporting to the Department of Health under the 'Performance in initiating and delivering clinical research initiative', or PID, the Foundation Trust is required to publish information regarding its performance in setting up and delivering research in a timely manner.

In order to meet the requirements of the Department of Health the Trust has to provide the following information on non-commercial trials:

- Information on all clinical trials which were open during the last 12 months
- Information regarding our performance in meeting the 70 day target for the time it takes from receiving a valid research application to the recruitment of our first patient to a trial.

We are also required to publish the following information regarding commercial contract clinical trials:

- Information on all commercial clinical trials closed during the last 12 months
- Information on our performance in recruiting the target number of patients to a trial within the target time.

This information is expected to be publicly available and the performance of the Trust against the National Institute for Health Research benchmarks will be published along with similar information from other organisations.

You can access the performance tables for Kingston Hospital NHS Foundation Trust by clicking on the links below:

Please note that the information published in these documents represents only the clinical trials meeting the criteria set down by the Department of Health. There are many other research studies running in the Trust which are not published here. If you want further information on the wide range of studies we are running please contact the R&D Department

**Please provide an additional link for the below table.

ID	Rec	Study Title	Date site invited	Date Site Selected	HRA Approval Date	Date Site Confirmed By Sponsor	Date Site Confirmed	Date site ready to start	Date of first patient Recruited	Delay in Recruiting first patient.
