

# Attend Anywhere Appointments

Information for patients

**Easy Read**

## easy read

This booklet uses easy words and pictures.

You might want to ask someone to help you read it.

## hospital

Some hospital appointments don't need to be face to face.

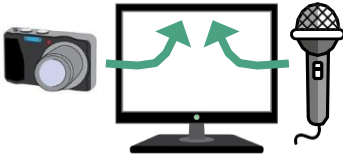

You could have your appointment using a computer, tablet or your phone.

## internet

## camera / microphone

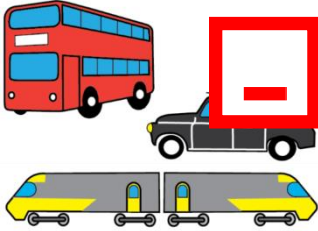

You need to have an internet connection to do this.

Your computer, tablet or phone needs to have a camera and a microphone on it. This is so people can see and hear you in the appointment.

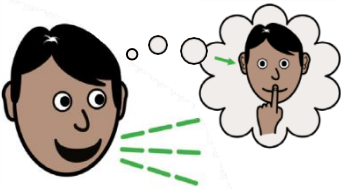

You need to have Google Chrome on your device. Or Safari if you use an Apple Device.

Instead of a waiting area you wait at home with your device for the person running your appointment.

## travel

## private information

## choosing who can help

You won't need to travel to hospital.

You will be talking about private information. You need a private place to do this, such as a bedroom.

You can ask someone to help you set the device up.

Type the web address from your appointment letter in the internet to go to your appointment.
