1. FIELD / SUBJECT

Function
 Policy
 Procedure / practice
 Service
 Strategy
 Document (if joint, state with whom)

Describe the main aim, objectives and intended outcomes of the above:

- To ensure that only competent practitioners, trained in clinical assessment request radiographs.
- To ensure that only competent practitioners, trained in clinical assessment and radiographic evaluation, request and interpret radiographs.
- To enable non-medical practitioners to comply with the regulations whilst facilitating them to request and/or interpret specified radiographs.
- To define the Kingston Hospital NHS Foundation Trust governance framework for all aspects of non-medical practitioners requesting and/or evaluation of radiography and outlines the required process for staff to practice as such.
- To outline the extended non-medical practitioners role and provide an outline of the administrative and procedural steps required by the practitioner to train and maintain their professional practice as a non-medical practitioner with rights in requesting and/or evaluating radiography.

An initial screening should be undertaken first. This helps to identify whether there is a possibility that people might have different experiences of the function/ policy / process/ strategy compared to others.

This initial EIA simply assesses whether different groups of people who use a service are affected by the intended function / policy/ practice / strategy more, less or in a different way than other groups of people. A differential impact occurs when a particular group has been affected differently by this in either a positive or negative/adverse way.

An assessment of whether there is a differential impact will be based on two factors – quantitative monitoring data and qualitative information, including the expert opinion from the EIA assessor who is normally the manager responsible for the delivery as well as someone with a different perspective. This would ideally be one or more service users or someone related to the service. There will be times when involving someone for their technical expertise or someone with specialist knowledge will be appropriate and EIA assessors should consider this. You must assess **each** of the 9 areas separately and consider how your document in section 1 may affect people's human rights.

2. ASSESSMENT OF POSSIBLE ADVERSE IMPACT AGAINST ANY MINORITY GROUP
