

INITIAL EQUALITY IMPACT ASSESSMENT (EIA) FORM

Name of policy / process / service / other	Acute Uterine Inversion	Date applicable	December 2020-December 2023
--	-------------------------	-----------------	-----------------------------

Responsible Staff Member: Diana Fleming
 EIA Assessor/s: Maternity Guideline Group
 Directorate: Specialist Services- Maternity Service Line

1. FIELD / SUBJECT

Function x Policy x Procedure / practice Service Strategy Document (if joint, state with whom)

Describe the main aim, objectives and intended outcomes of the above:

- For all birth attendees to understand and appropriately manage uterine inversion and ensure early involvement of the relevant multidisciplinary staff
- Ability to diagnose uterine inversion.
- Demonstrate a confident and competent management of uterine inversion.
- Enables rapid investigation and treatment
- Helps to achieve the best possible outcomes for woman and reduce the risk of adverse outcomes

An initial screening should be undertaken first. This helps to identify whether there is a possibility that people might have different experiences of the function/ policy / process/ strategy compared to others.

This initial EIA simply assesses whether different groups of people who use a service are affected by the intended function / policy/ practice / strategy more, less or in a different way than other groups of people. A differential impact occurs when a particular group has been affected differently by this in either a positive or negative/adverse way.

An assessment of whether there is a differential impact will be based on two factors – quantitative monitoring data and qualitative information, including the expert opinion from the EIA assessor who is normally the manager responsible for the delivery as well as someone with a different perspective. This would ideally be one or more service users or someone related to the service. There will be times when involving someone for their technical expertise or someone with specialist knowledge will be appropriate and EIA assessors should consider this. You must assess **each** of the 9 areas separately and consider how your document in section 1 may affect people's human rights.
